Decking

Decking

Cusp solid timber Decking is manufactured from 100% sustainable plantation-grown eucalypt hardwood. Our Rosetop Oak decking will transform your outdoor space, without compromising on strength or durability. When treated, it's resistant to rot, insects, and water damage, ensuring longevity. Its natural beauty seamlessly blends with your Australian surroundings. Rosetop Oak (*Eucalyptus Grandis*) is native to Australia and is one of the most productive plantation eucalypts when grown in the right environment. As such, it is readily available.

Technical details

With a Janka rating of 7.5, our Rosetop Oak's hardness is ideal for decking. It has a class 2 above-ground durability rating (15-40 years). It is not susceptible to Lyctid Borer and has a BAL (Bushfire resistance rating) of 12.5 - 19 All AS3959 required applications.

Our range includes:
