

Cusp –
We make what's next

Doors

Doors

Cusp manufactures its solid timber doors from 100% sustainable plantation-grown eucalypt hardwood. Our Rosetop Oak doors are highly resistant to warping, swelling and shrinking. Timber doors are highly durable, capable of withstanding years of heavy use, with natural insulation properties.

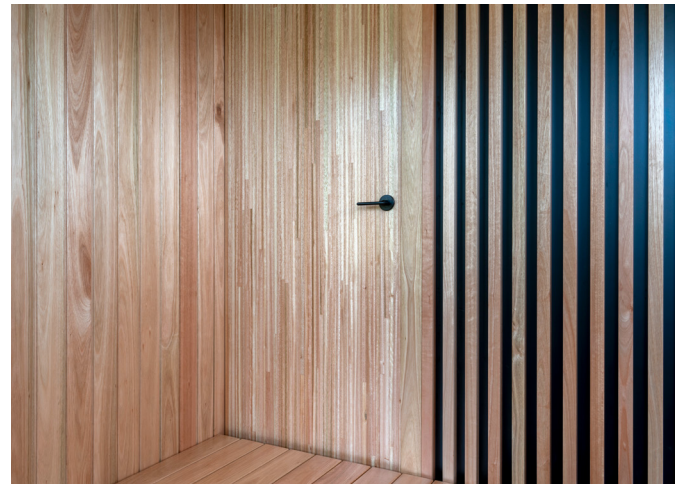

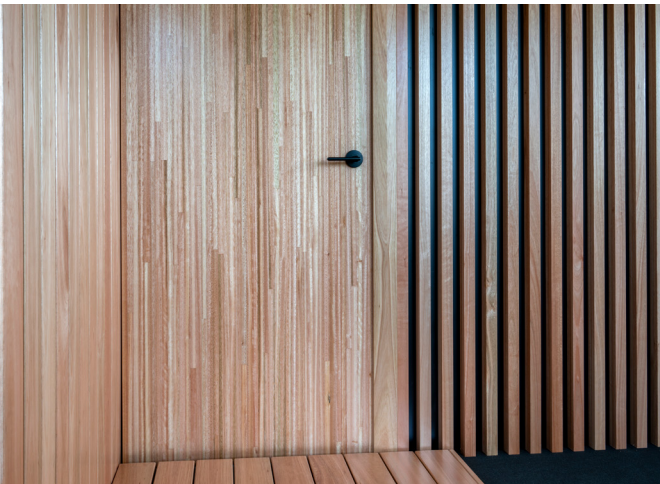

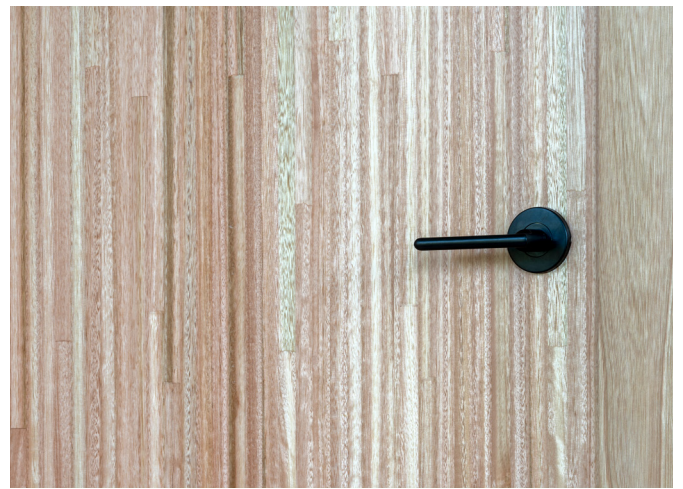

Our doors reflect a beautiful blond timber with buttery bronze, and rosy, pink tones. Rosetop Oak (Eucalyptus Grandis) is native to Australia and is one of the most productive plantation eucalypts when grown in the right environment. As such, it is highly accessible.

Our range includes:

Dimensions:	720, 820, 920 x 2040mm as standard
Custom Sizes:	available
Thickness:	33 or 43mm
Material:	solid timber laminate

Technical details

Rosetop Oak will readily accept paint, stain, polish, and oiling. It is not susceptible to Lyctid Borer.
