

Cusp –
We make what's next

Flooring

Flooring

Cusp manufactures its flooring components from 100% sustainable plantation-grown eucalypt hardwood. Our Rosetop Oak (Eucalyptus Grandis) is a beautiful blond timber with buttery bronze, and rosy, pink tones. Timber brings warmth to a space, reducing the need for excessive heating in the home. It is native to Australia and is one of the most productive plantation eucalypts when grown in the right environment. As such, it has great availability.

Technical details

Rosetop Oak has a Janka rating of 7.5, which is ideal for flooring. It has a class 2 above-ground durability rating (15-40 years). It can be easily sanded and machines well to deliver a smooth finish. It will readily accept stain, polish, and oiling. It is not susceptible to Lyctid Borer and has a BAL (Bushfire resistance rating) of 12.5 – 19 All AS3959 required applications.

Our range includes:

Dimensions:	108 x 19mm
Solid lengths:	set length standards 2700-4800mm
Custom lengths:	available to 7200mm
Material:	solid to 4800mm, FJ to 7200mm
End-matching:	available
